

Example of a Custom Entry Form Object

For project task form, the following feature dependency must be added in the manifest file:

123456789

<dependencies>
 <features>
 <feature required="true">ADVANCEDJOBS</feature>
 </features>
</dependencies>

Copy

The following custform_99 example is a customized entry based on the standard project task form. It is specified for the project task record as a preferred form and includes main fields and action bar buttons.

<entryForm scriptid="custform_99" standard="STANDARDPROJECTTASKFORM">
